Take 11 A moving MICE experience

The network of **Hong Kong Trams** has run through the city for more than 100 years, conveying the industrious peoples of the city as they make their to and from work. Back then it was a transport workhorse. Now, it is a window on the past and a unique platform for events and incentives.

From the open-top upper deck, your delegates can soak up a spectacular 360-degree view of Hong Kong Island by night as the tram rolls from the historic Western District and downtown business centre, through to the Causeway Bay shopping hub. Planners can hire either an antique double-decker with its open roof on the top level or a regular work-a-day tram. It's an experience that makes for a memorable and fascinating trip.
